

HERE'S THE DIRT ON 2021 CONSTRUCTION

In the summer of 2016, the FCC adopted the Alaska Plan, which provides funding that will drastically improve and expand broadband and wireless services throughout our state. Copper Valley Telecom is proud to be not only meeting but exceeding the goals outlined in this ten-year program.

As part of this project, not only does CVT have eight new cell sites planned, but we are undertaking an unprecedented number of new Fiber to the Home builds this summer as well. With projects all over the Copper River Basin and through the Valdez area, we are improving wireless coverage throughout the region and bringing fiber internet to over 1300 new households and businesses!

To reach all of those new fiber drops, we

will be laying a monumental 133.3 miles of new fiber lines across the rugged Alaskan wilderness. The enormity of the task isn't just in the distance covered by the project, but the complexity as CVT will need to utilize directional drilling to cross a combined 17,568 feet of streams, rivers, and highway.

Throughout the summer, you can expect to see Copper Valley Telecom's outstanding teams of contractors and employees alongside the road system, as well as on properties within the utility easement. Construction that is completed this year will allow for in-home installations next summer, and current customers will be contacted when installation becomes available in their area. Give us a call at 800.235.5414 or visit cvtc.org/construction to learn more about this exciting project.

FIBER TO THE HOME

- Valdez Mobile Home Park
- Zook Subdivision
- Valdez Airport Area
- Glennallen Proper
- Sourdough Camp Area
