# THE DIRT ON CONSTRUCTION

Copper Valley Telecom is hitting the ground running with another monumental year of Fiber-to-the-Home construction! With snow levels decreasing, you can expect to see us along the New Edgerton 0-20 mile, Old Edgerton 0-11.5 mile, and Richardson 54-91 mile. This will result in 483 new fiber install locations for the 2022 season!

This season's early start of construction has allowed us to use the frozen ground to extend the construction season, reach more customers, and reduce our environmental impact by minimizing disruptions to the local ecosystem. The construction completed in 2021 will allow for in-home installations this summer, and our staff

will be contacting customers when installation becomes available. Likewise, this year's construction will allow for in-home installation in 2023.

Additionally, we will be expanding LTE coverage throughout Thompson Pass and areas between Sourdough Creek and Paxson, as well as filling in gaps in connectivity along Richardson Highway south of Willow Mountain.

We thank you for your continued support and patience with the new construction season as we continue to build connections that matter.
